

ICL-GNSS Call for Papers

INTERNATIONAL CONFERENCE
ON LOCALIZATION AND GNSS

2019

JUNE 4 - 6
Nuremberg, Germany

General Chairs

Jari Nurmi, TUT, Finland
Albert Heuberger, Fraunhofer IIS, Germany

TPC Chairs

Elena-Simona Lohan, TUT, Finland
Alexander Rügamer, Fraunhofer IIS, Germany
Wolfgang Koch, Fraunhofer FKIE, Germany

Steering Committee

Jari Nurmi, TUT, Finland
Fabio Dovis, Politecnico di Torino, Italy
Gonzalo Seco Granados, UAB, Spain
Elena-Simona Lohan, TUT, Finland
Jose Lopez-Salcedo, UAB, Spain
Alexander Rügamer, Fraunhofer IIS, Germany
Terry Moore, Nottingham, United Kingdom
Stephan Sand, DLR, Germany
Adriano Moreira, UM, Portugal

Dates and Deadlines

Special session proposals: 15 January
Full paper submission: 15 February
Notification of acceptance: 15 March
Camera-ready papers: 15 April

Contacts and Information

www.icl-gnss.org/2019

Reliable navigation and positioning are becoming essential in applications for IoT in industry and logistic applications, in smart city environments, for safety-critical purposes, in public services and consumer products to guarantee transparent, efficient and reliable workflows. A robust localization solution, which will be available continuously is needed regardless outdoor and indoor, and on different platforms. ICL-GNSS addresses the latest research on wireless and satellite-based positioning techniques to provide reliable and accurate position information with low latency. The emphasis is on the design of mass-market navigation receivers and related tools and methodologies.

- Antennas and RF front-end for GNSS receivers
- Design, prototyping and testing of positioning devices
- Acquisition, tracking and navigation algorithms
- Detection and mitigation techniques for adverse propagation conditions
- Wireless and sensor-based localization
- GNSS applications for remote sensing, ionospheric sounding and space weather
- Precise timing for GNSS and terrestrial systems
- Security and privacy in joint communication and navigation systems
- Authentication and privacy aspects of positioning
- Spoofing countermeasures
- Cooperative and peer-to-peer positioning
- Positioning based on signals-of-opportunity
- Multi-GNSS receivers and emerging navigation satellite systems
- Indoor positioning and localisation in densely populated urban areas
- Hybrid NAV/COM positioning
- Cognitive positioning architectures
- Positioning for autonomous systems (robots, planes, land and marine vehicles)

We invite you to submit your original full papers on the most recent results and technology trends in the fields of positioning. Accepted and presented papers will be published in the conference proceedings.

Paper Submission: Submitted papers must represent original material that is not currently under review in any other conference or journal, and has not been previously published. Papers should be four to six pages long in the specified format. Papers should be submitted as pdf files prepared according to IEEE two-column A4 format guidelines.
